Engineering Link
375 University Avenue, 9th Floor, Toronto, ON

DESCRIPTION

Engineering Link is a Canadian firm offering building envelope and structural engineering services relating to the science of built environments. Whether you are designing a new building, modifying an existing building or restoring a heritage building, Engineering Link has the expertise to meet your needs.

To accommodate its growing business, Engineering Link moved their office from an older part of Toronto to the 9th floor of the beautiful Manulife building on University Avenue.

Fox took the once empty space and provided a full turn-key solution for Engineering Link's team. The renovation included offices, meeting rooms and workstations, along with a storage room, lunch room and reception.

The scope of work for this project included new millwork, glazing and flooring throughout, as well as electrical, plumbing and HVAC.

PROJECT
6,800 sq. ft.
