

COMMERCIAL CONTRACTING
FOXCONLTD.COM

Holland Bloorview
150 Kilgour Road, Toronto, ON

DESCRIPTION

Fox worked with Holland Bloorview Hospital on this alternation for their HIM and ENS units.

Construction for the HIM area consisted of:

- New wall to separate the space
- Fresh coat of paint
- New automatic door operators installed in each door

Construction for the ENS area consisted of:

- Removal of all offices to accommodate the new layout
- New partitions
- New doors and frames to enter each new area
- New millwork for personal belongings
- New automatic door operators installed in each office

After levelling the floors, new fused Forbo flooring was installed throughout the wing. Fox also installed a double door maglock in the corridor under a separate permit.

Thanks to this fit-out, the ENS and HIM areas are now bright, functional spaces fully equipped for exceptional patient care.

PROJECT
16,000 sq. ft.
